

IND1268

To: U.S. Coast Guard and the Maritime Administration
Re: Liberty Natural Gas LLC, Port Ambrose Deepwater Port
Draft Environmental Impact Statement
Docket ID: USCG-2013-0363

Comments:

IND1268-1

Upon reading about the implications of the Port Ambrose Terminal I learned about the wind turbines that were meant to be put in the same location prior to the decision on Port Ambrose. The installation of this liquified gas terminal as opposed to renewable energy sources is pushing NY back in it's advancement in energy sources and adds to pollution in the state. In order to further this state's impact on a cleaner environment it would be essential to veto this plan.

Sincerely,

Name: Jesse-Rose McDade

Address: 536 Beach 126th St., Belle Harbor, NY 11694

Re: Liberty Natural Gas LLC, Port Ambrose Deepwater Port
Draft Environmental Impact Statement
Docket ID: USCG-2013-0363

Comments:

I don't agree with the Port Ambrose project being proposed.

Not only am I against any type of harm to the

environment but the idea completely ~~goes~~ defeats the

IND1269-1 climate control goals here in New York. Not only will

IND1269-2 the Long Island community be effected by this gas to

liquid pipeline but all the nearby boroughs as well. This

IND1269-3 idea would also directly compete for space with proposed
offshore wind projects. These projects are highly necessary
for producing clean energy. Please do not allow for this
hazardous practice to come to New York.

Sincerely,

To: U.S. Coast Guard and the Maritime Administration
Re: Liberty Natural Gas LLC, Port Ambrose Deepwater Port
Draft Environmental Impact Statement
Docket ID: USCG-2013-0363

Comments:

IND1270-1 Port Ambrose would threaten the safety of the public for a number of reasons. Besides the fact that liquefied natural and petroleum gas is extremely volatile and highly flammable, it can also cause frostbite or death due to rapid freezing of body tissue and can pose risks of fires or explosions in local commerce hubs due to its unpredictable nature. These are not
IND1270-2 just forecasts—they are realities for some. In 1973 an explosion at a LNG storage facility on Staten Island killed 40 people. This is reason enough to reject this terminal. New Yorkers cannot be subjected to these risks.

Sincerely,

Re: Liberty Natural Gas LLC, Port Ambrose Deepwater Port
Draft Environmental Impact Statement
Docket ID: USCG-2013-0363

Comments:

Converting Port Ambrose to an export terminal for natural

IND1271-1 gas is a lose-lose situation. Not only would it set New York back from an environmental standpoint by deepening the dependence on fossil fuels but also for public health and recent strides that have been made that support renewable clean energy. If the

IND1271-2 terminal is left as an import terminal, it will suffer from enormous economic blows, as the domestic market does not demand natural gas because it is oversaturated. The choice is between financial ruin or global environmental ruin - don't put New York in that situation.

Sincerely,

Re: Liberty Natural Gas LLC, Port Ambrose Deepwater Port
Draft Environmental Impact Statement
Docket ID: USCG-2013-0363

Comments:

According to the New York State's Liquefied Natural and Petroleum Gas Act, "liquefied natural and petroleum gas is extremely volatile, highly flammable and dangerous substance which if released into the air will cause severe damage[#] from the point of release." This makes Port Ambrose a valuable target for terrorism and a high value priority. For the concern of the New York State residents, including myself, Port Ambrose is a bad location to construct for a Liquefied Natural Gas terminal because it would ~~not~~ present a high risk of vulnerability if an attack on the United States have been prevented.

Email: dnagram20@yahoo.com

CC: Governor Cuomo

IND1273 See response to FA4-2 for a discussion of purpose and need, and peak demand.

As stated in Section 1.1 of the final EIS, the increased natural gas supply in New England for the winter of 2014-2015, including LNG imports from the Northeast Gateway Deepwater Port, off the coast of Boston, Massachusetts, contributed to reduced average wholesale energy prices from an average of \$138 per megawatt hour in the winter of 2013-2014, to an average of \$77 per megawatt hour in the winter of 2014-2015 (ISO New England 2015). Increased fuel supply during the winter peak demand directly contributed to the lower price levels in 2014-2015 (ISO New England 2015).

Comments:

IND1292-1 See response to IND24-3

IND1292-1

Liberty Natural Gas should not be permitted to build a liquefied natural gas terminal in NY's waters because it would seriously damage our environment. The project will emit methane and diesel particles into our atmosphere, which will worsen air pollution. The current Environmental Impact Statement for this project fails to address the 183,420 TONS of CO₂ equivalents that will be spewed into the air from vaporization ~~alone~~ ~~not~~ from Port Ambrose. This completely works against NY's commitment to reduce greenhouse gas emissions, as is stated in our Energy Plan. Also, Port Ambrose would prevent construction of a wind turbine field in NY's waters, and deepen our dependence on fossil fuels rather than promote clean energy.

 Re: Liberty Natural Gas LLC, Port Ambrose Deepwater Port
 Draft Environmental Impact Statement
 Docket ID: USCG-2013-0363

Comments:

Dear Coast Guard,

I am concerned about the construction of Port Ambrose. My concern is not unfounded as I am educated about the possible economic and environmental effects involved in this construction. Liquefied Natural Gas is a volatile substance, capable of an explosion at any time. The explosion in 1973 on Staten Island has not been completely forgotten! We do not need to risk more lives immediately, and ultimately hurt the environment more. Containing methane gas, the release of LNGs would be highly toxic to the environment, facilitating global climate change.

Sincerely,

Re: Liberty Natural Gas LLC, Port Ambrose Deepwater Port
Draft Environmental Impact Statement
Docket ID: USCG-2013-0363

Comments:

Dear U.S. Coast Guard,

IND1345-1

I am really concerned about the proposed construction of Port Ambrose. The construction of Port Ambrose will cause the release of methane into the atmosphere, a greenhouse gas 86 times more potent than CO₂ over a 20 year period. This will only serve to further exacerbate New York's climate crisis by ~~deepening~~^{deepening} our dependence on fossil fuels.

Thank you

Sincerely,

Name: Samantha Larmee

Address: 108 woods end Rd. Chappaqua, NY 10514

School: SUNY Purchase

Email: samantha.larmee@purchase.edu

CC: Governor Cuomo

IND1345-1 See response to IND11-2. See response to CO128-5.

Re: Liberty Natural Gas LLC, Port Ambrose Deepwater Port
Draft Environmental Impact Statement
Docket ID: USCG-2013-0363

Comments:

IND1346-1

Port Ambrose is a bad investment. Domestic markets have been flooded with natural gas ^{driving} ~~driving~~ down costs to the point where many natural gas operation are struggling to turn a profit. Since natural gas is selling at much higher rate in countries like Japan, China and India we end up exporting domestic gas there, rather than importing gas here, so why risk so much for something that won't help New Yorkers?

Comments:

Hello, my name is Alex Yam and I am a student at Queensborough Community College and I am calling on Governor Cuomo to veto the Port Ambrose LNG Deepwater Port. Although we do need a renewable energy source, we need a greener option that won't present a potential risk to the city of New York. We need to create space for the offshore wind projects and give it a chance to produce natural energy. It will also help New York reduce its gas emissions and pollution.

Sincerely,

Name: Alex Yam

Address: 14014 Oak Avenue, Flushing NY 11355

School: Queensborough Community College

Docket ID: USCG-2013-0363

Comments:

IND1404-1

I strongly urge you to prioritize the Long Island New York Offshore Wind Project's venture in Port Ambrose over Liberty Natural Gas's plans for an LNG storage facility. We are at a turning point in history where we as a country need to invest in renewable energy over fossil fuels for our planet's future. Aside from the basic logic of this, sources predict that the windmill farm would be a boon for the Long Island-New York area, with 2,800 full time jobs plus \$645 million injected into the local economy, versus Liberty's "800 construction jobs and dozens of operational jobs" and a continued encouragement in reliance on fossil fuel.

Comments:

IND1434-1

So Cuomo...about that ^{planned} storage facility in Port Ambrose.
 It is a bad idea. Storage facilities can erode and the gases
 can and will leak into the ^{ground} ~~ground~~. That is a health hazard,
 that oil can kill ~~people~~ ^{and} it has which is why storing
 liquefied natural gas used to be banned in NY. You should
 instead, back up the environmentally friendly option of building
 a wind farm in Port Ambrose.

P.S. If you ban fracking, you should not back up something that came from
 fracking. It defeats the purpose of banning fracking, basically back up real
 renewable energy.

IND1470-1

I do not support the proposed LNG Terminal at Port Ambrose because of the harmful impact it will have on our environment. The process of converting liquified natural gas to its gaseous state is highly volatile and dangerous for the ecosystem of the Long Island Sound. Governor Cuomo should veto this proposal on the grounds that this proposal does not help New York reduce greenhouse gas emissions, reduce our dependency on fossil fuels, and further protect ~~our~~ the ecosystem of the Long Island Sound.

Comments:

IND1472-1

As a College student living close to Long Island I believe that the Natural Gas Port will lead to negative consequences. I am part of the future and it will be my generation that will suffer those negative consequences. In order to improve our environment we should use wind mills instead of Natural Gas. Wind mills will also help us move away from Natural Gas. That is why I strongly disagree with the Port Ambrose Deepwater Port. It is time we stop relying on Natural gas!

 Re: Liberty Natural Gas LLC, Port Ambrose Deepwater Port
 Draft Environmental Impact Statement
 Docket ID: USCG-2013-0363

Comments:

IND1535-1

The proposed LNG facility at Port Ambrose, is a step in the completely opposite direction of actions we must take as a state to protect our environment and prevent some of the worst effects of Climate Change. As a bellweather state, our increased dependence on fossil fuels would send a message to the rest of the United States that we need to increase our reliance on those fuels. We need to, instead of the LNG facility, to build ~~our~~ renewable energy infrastructure. The expense to build Port Ambrose could be better used in a wind farm in this location, not to mention the jobs that could be created. LNG facilities are inherently unsafe, both to people and the environment, and we need to protect both the people of Long Island and New York as well as the environment.

Comments:

IND1542-1

I hope you will put your support in the Long Island-New York offshore Wind Project plan for Port Ambrose rather than Liberty Natural Gas's plan for the same area. We must remember that LNG is not always safe: we can remember the 1973 explosion on Staten Island & the 1941 Cleveland Disaster. Things have changed but we are not necessarily safe - just last year an LNG facility in rural Washington experienced an explosion that could have devastated the surrounding area. For the safety of our community & environment we should do the right thing & invest in renewable, safe energy.

 Re: Liberty Natural Gas LLC, Port Ambrose Deepwater Port
 Draft Environmental Impact Statement
 Docket ID: USCG-2013-0363

Comments:

IND1556-1 The world agrees that we need to decrease our climate pollution by 80% by 2050. Further, New York agrees that we should use 50% more renewable energy by 2025. These are goals that the world is capable of achieving as long as the correct steps are taken to pursue them. We have started moving towards these goals on the right foot by banning fracking in New York. We must be consistent and continue to move forward ~~without using~~ Port Ambrose, ~~which~~ to the detriment to our environment, releases fossil fuels and, as a result, can negatively effect the health of the people. We need to choose a safer and more beneficial alternative, an off shore wind farm. This fuel source does not pollute the air, ~~and~~^{it} is not only cleaner but also cost effective. Using windmills as opposed to Port Ambros will allow us to continue in pursuing our goals in improving the environment while still creating energy in a cleaner and more sustainable fashion.

 Re: Liberty Natural Gas LLC, Port Ambrose Deepwater Port
 Draft Environmental Impact Statement
 Docket ID: USCG-2013-0363

Comments:

IND1558-1

After making bold strides in banning fracking in New York, it is imperative that the LNG port, Port Ambrose, be rejected. It is broadly agreed upon that fossil fuels need to stay in the ground in order to sustain our future + the planet. So in order to ensure we meet the 80% reduction in climate pollution by 2050, we need to focus our energy on renewable sources of energy, like the wind farm proposed in the same location as Port Ambrose. Reject Port Ambrose; Build Wind Farms!!!

 Draft Environmental Impact Statement
 Docket ID: USCG-2013-0363

Comments:

IND1590-1

Port Ambrose in NY wouldn't be a healthy idea for our environment. We should lessen our dependence on fossil fuels. Climate Change is a real and serious issue that won't

IND1590-1 See response to CO128-5.

IND1590-2

fix itself. NY can't reduce greenhouse gas emissions by 80% by 2050 with the build out of natural gas infrastructure.

IND1590-2 See response to IND814-3.

Sincerely,

Re: Liberty Natural Gas LLC, Port Ambrose Deepwater Port
Draft Environmental Impact Statement
Docket ID: USCG-2013-0363

Comments:

I Urge Governor Cuomo to officially Put a Stop
on the Port Ambrose Deepwater Port. The
Port Ambrose Project would delay our goal
to reach 50% in renewable energy by the year
2025. By approving the Port Ambrose Project
we would be prolonging our dependence on fossil
fuels, which is contributing to Climate Change.

A better use for the Port Ambrose Deepwater Port
would be to complete the Off Shore Wind Project.
Which will contribute to Clean and safe energy.

Sincerely,

Name: Brianna Jones

 Re: Liberty Natural Gas LLC, Port Ambrose Deepwater Port
 Draft Environmental Impact Statement
 Docket ID: USCG-2013-0363

Comments:

I disapprove of the construction of Port Ambrose.

IND1592-1 We should invest money in something that will be more helpful to our society, such as offshore wind

IND1592-2 projects. I believe it is very dangerous and risky because it is only 16 miles southeast of Jones Beach.

I urge you to veto this project that way we can use the money and invest in renewable energy.

Sincerely,

 Re: Liberty Natural Gas LLC, Port Ambrose Deepwater Port
 Draft Environmental Impact Statement
 Docket ID: USCG-2013-0363

Comments:

IND1593-1 I strongly urge you
 to please consider the
 dangers of liquified natural
 gas and not build Port
 Ambrose. The dEIS does
 not take into account life cycle
 natural gas emissions. New York needs
 to invest in renewable energy solutions
 such as offshore wind, solar, and
 tidal; not dirty fossil fuels. LNG =
 climate change!

Sincerely,

Re: Liberty Natural Gas LLC, Port Ambrose Deepwater Port
Draft Environmental Impact Statement
Docket ID: USCG-2013-0363

Comments:

The proposed Port Ambrose terminal is a disgrace.

IND1596-1 Anyone with a basic understanding of climate science knows that ~~this methane is~~ one of the most dangerous pollutants there is. If New York actually desires to be a leader on renewable energy, we cannot allow that reputation to be tainted by corporate and political

IND1596-2 greed. We will not reach our own benchmarks, which would be a further disgrace. People over profit!
